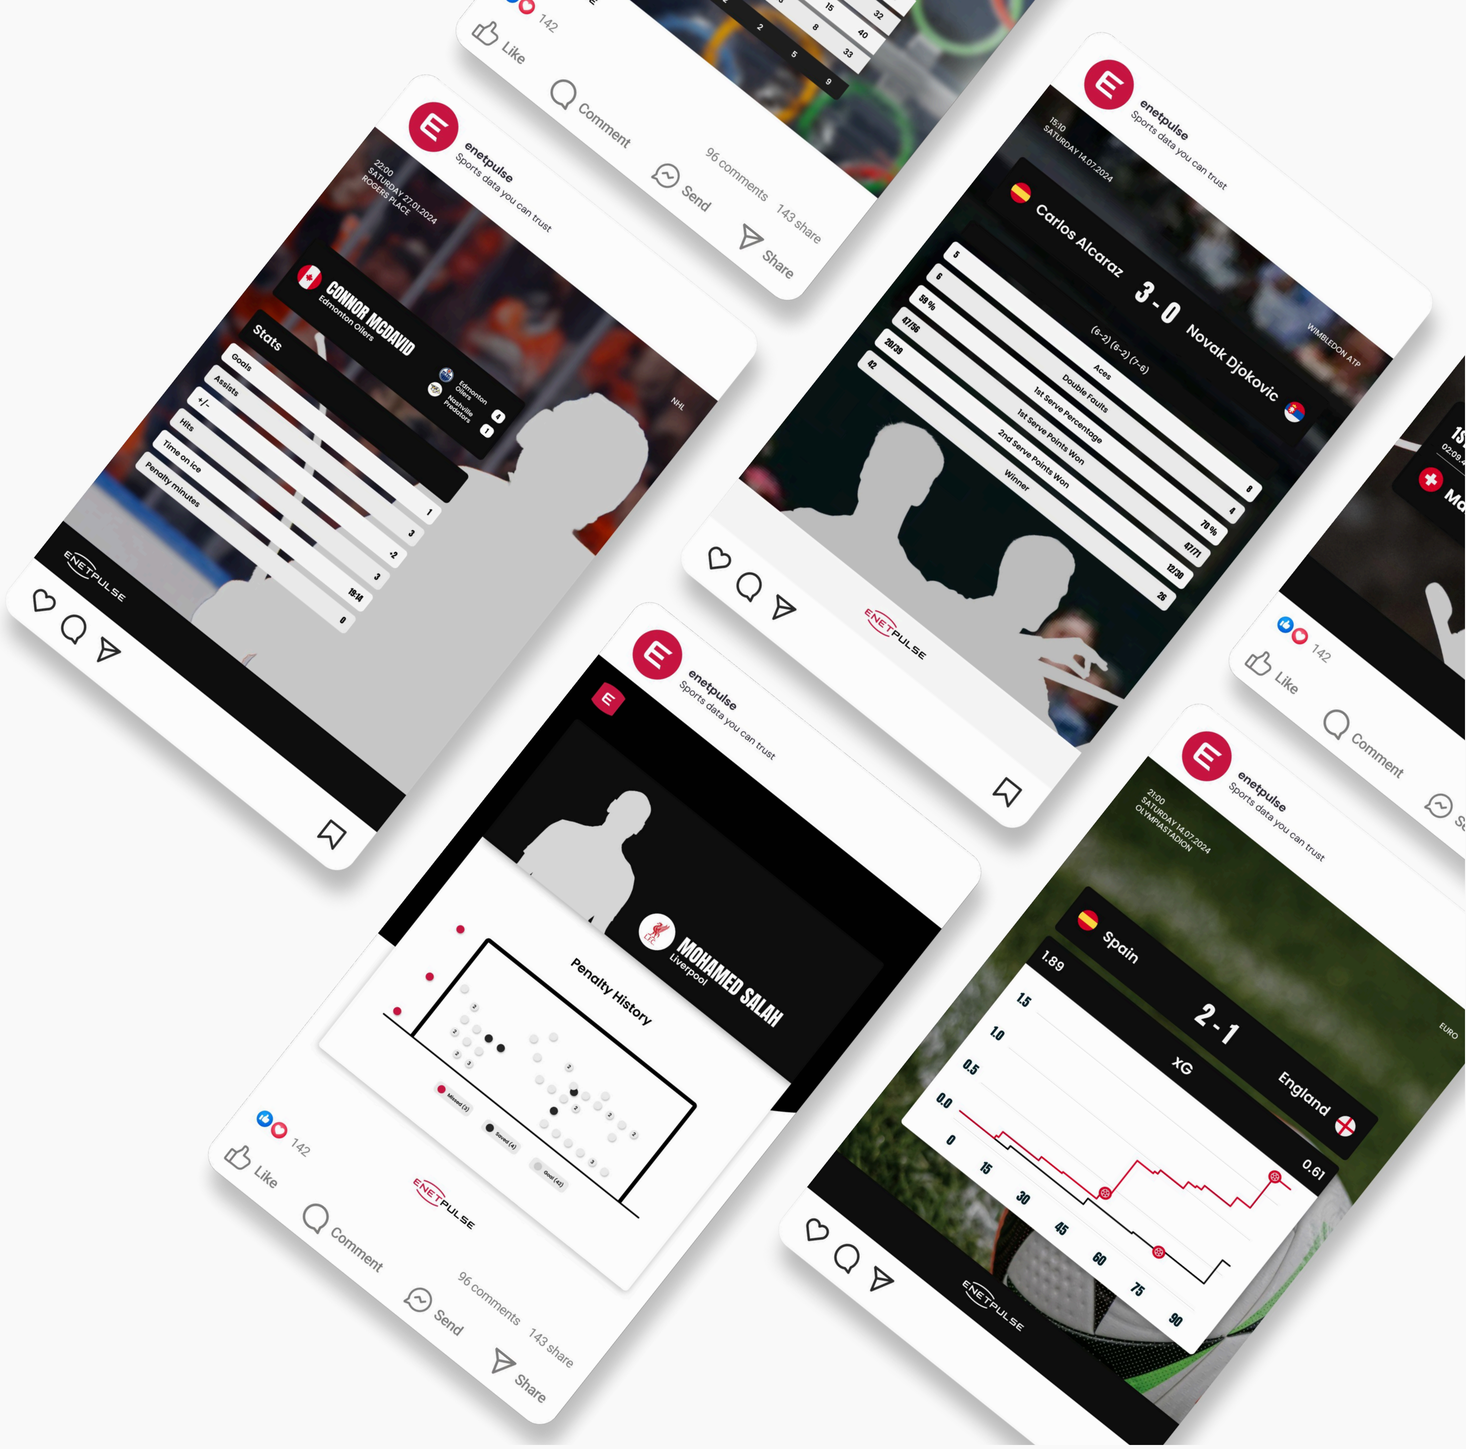
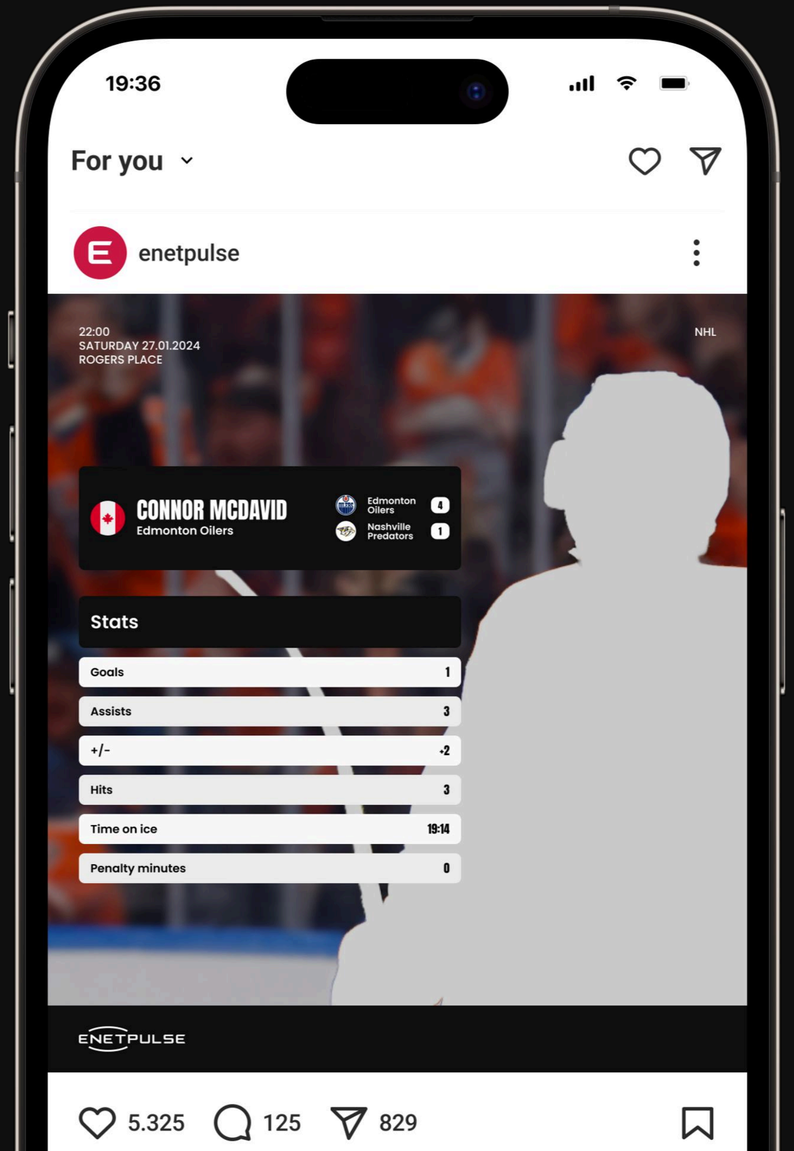
TURNING SPORTS DATA INTO VISUALS

EnetGraphics

Introducing the Enetpulse Sports infographics platform. With EnetGraphics you get your own customised templates created to engage your users. Utilise and drive traffic to your social media channels by adding new dimensions.



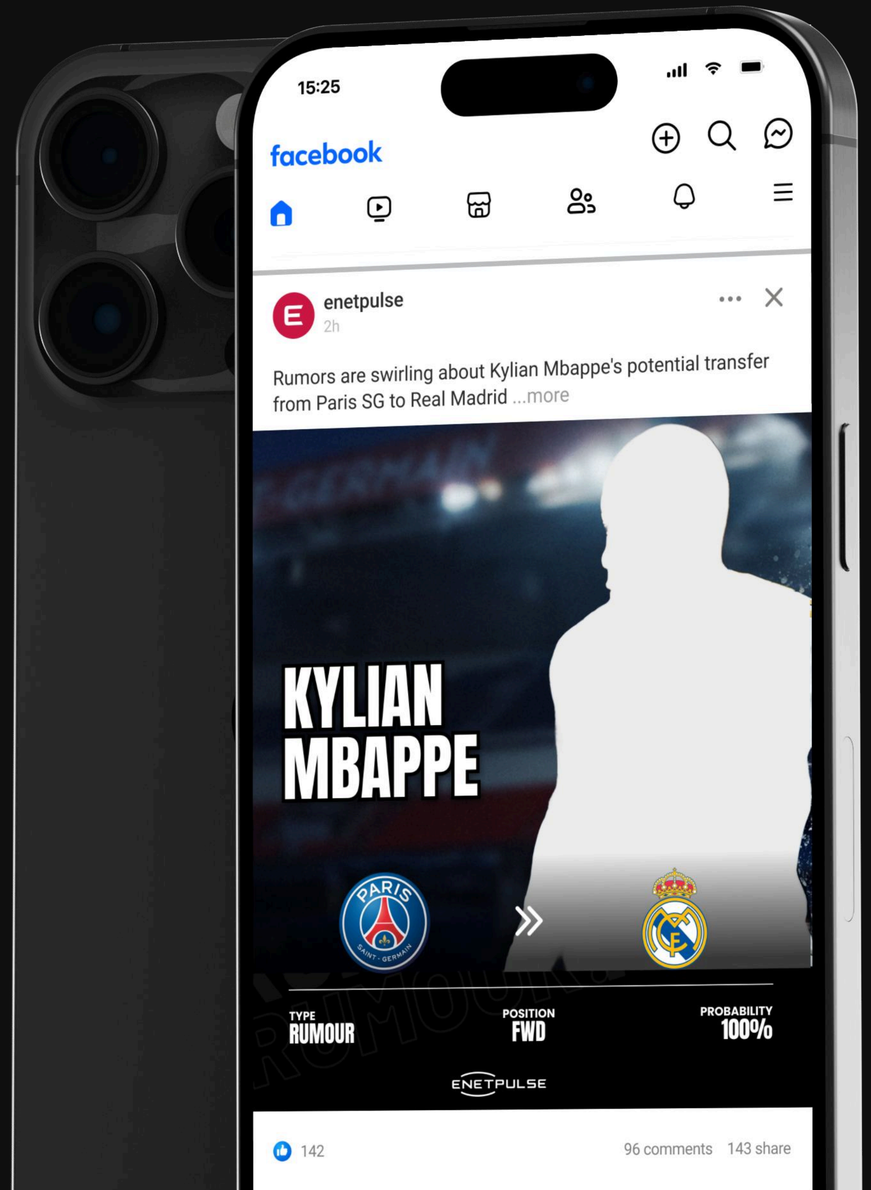
Customise your sports data content

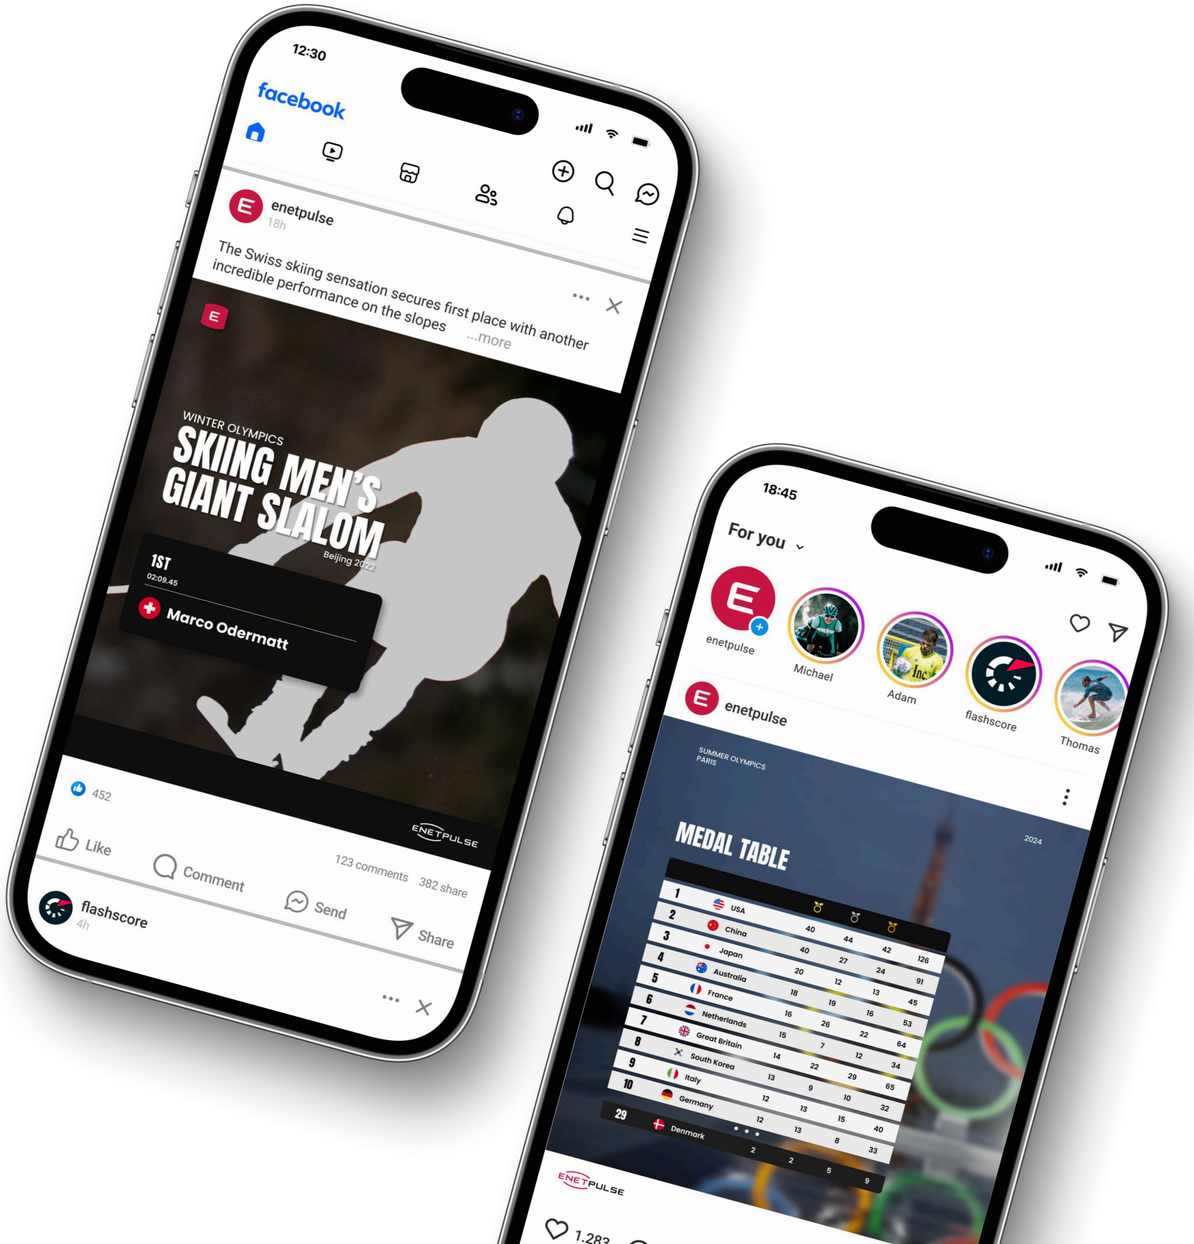


The EnetGraphics system allows you to build your own unique content based on *your* selected templates.

With our platform you get the benefits of:

- Data-driven semi-automated banners
- Sports data integrated into the back-end
- Customise templates to your corporate identity
- Create fast & engaging content
- Social media integration available





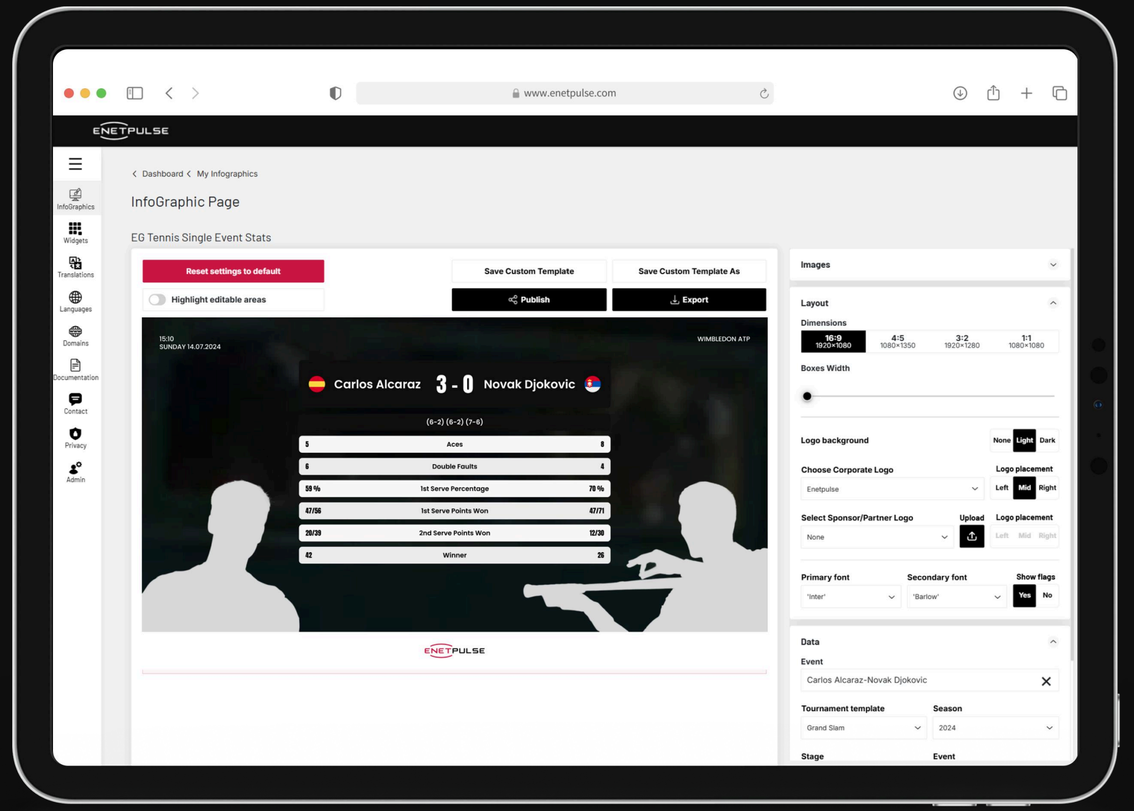
The social media integration

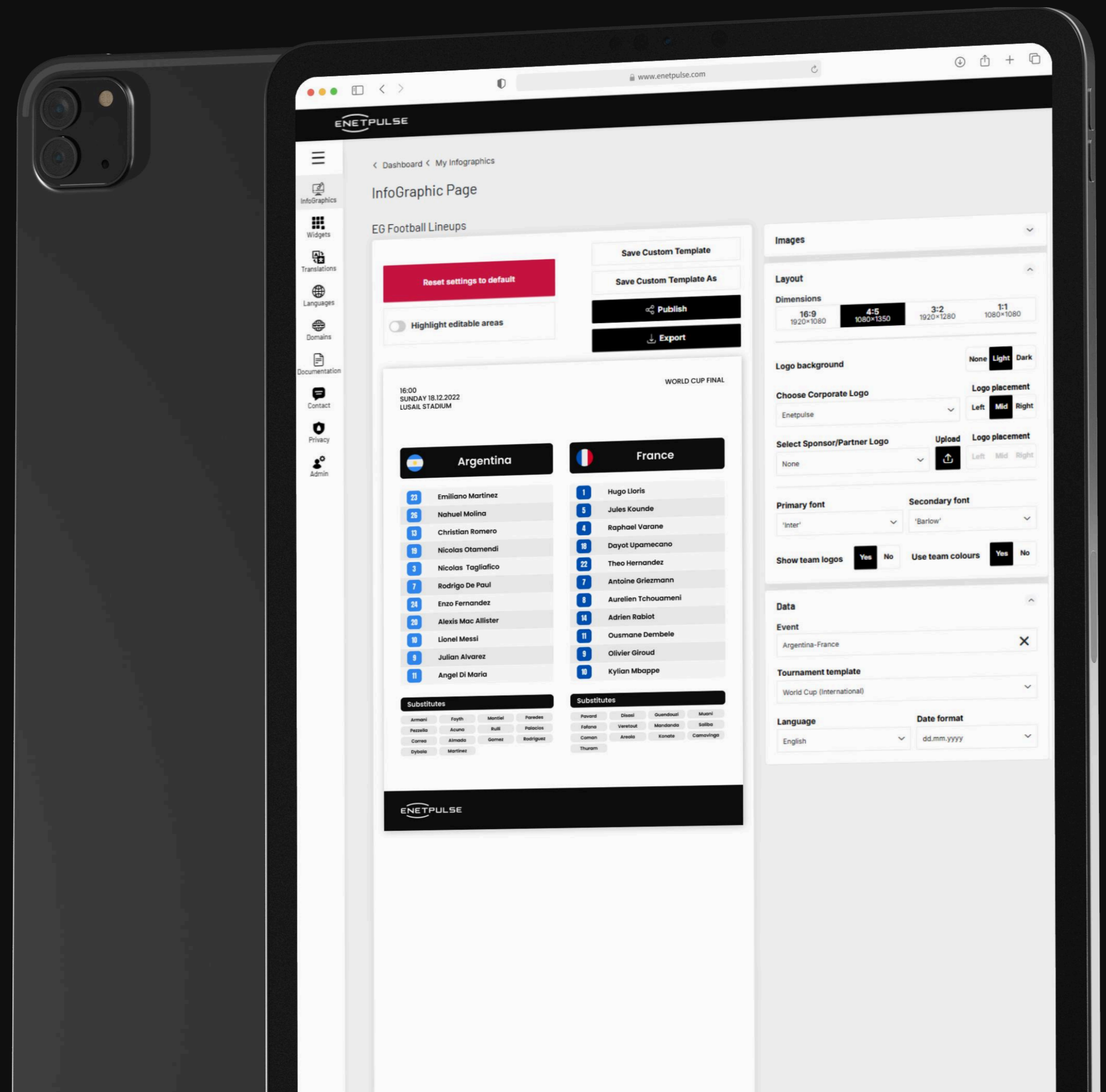
Our EnetGraphics templates gives you what you need to scale your content game. With the social media integration, you'll be allowed to streamline your content production and execusion.

- Integrate the Enetgraphics system to your SoMe-accounts.
- Create engaging sports related content in no time.
- Drive traffic to your social channels.

The EnetGraphics platform

Our platform allows you to customise content down to the specific level of detail you require. With your selected templates, powered by our broad sports data coverage, you'll be set to share your graphic content.

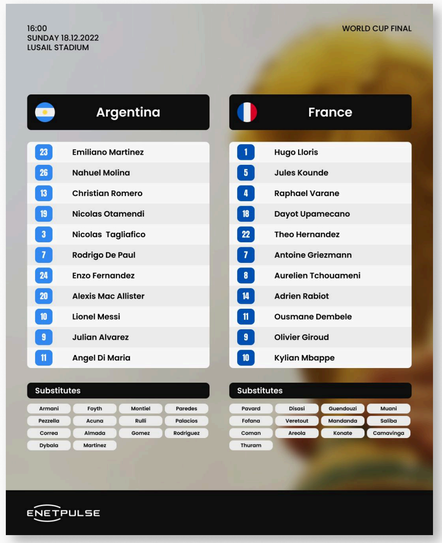


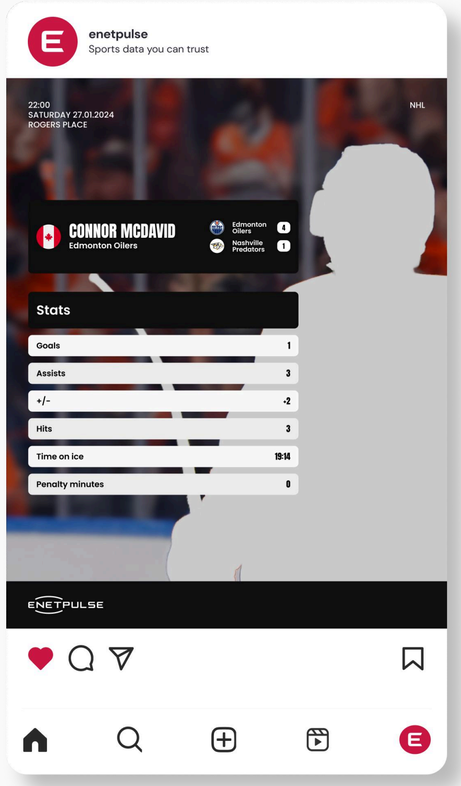


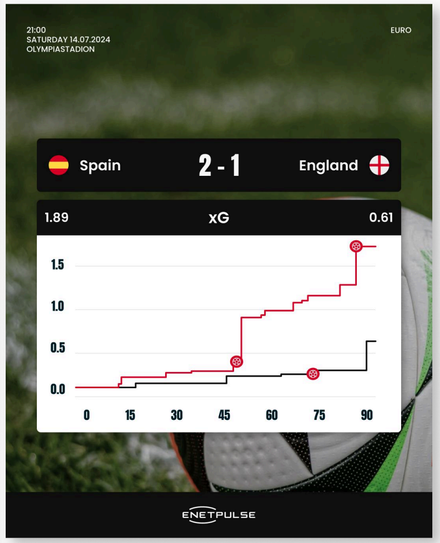
With our platform you can:

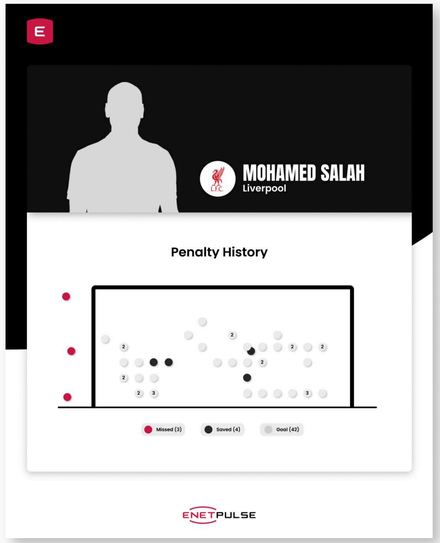
- Select the relevant data points
- Create your content “on the go”
- Direct uploads to social media
- Save on design resources
- Remove background & customise to brand identity

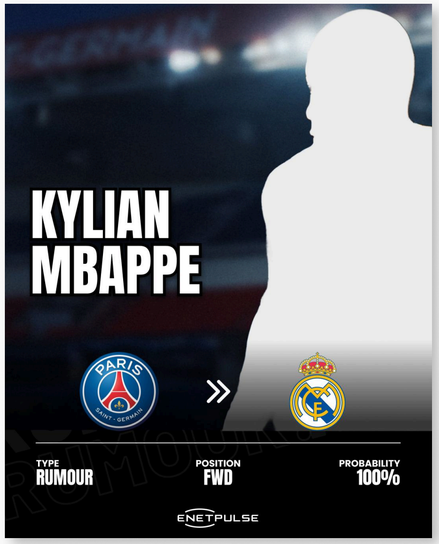
Template examples











Answers to your questions

Can I get the product designed with my branding?

We do offer customer branding per request. This of course will include a set-up cost but once set up, you can then use all different templates with your branding.

Can I add an image to the EnetGraphics tool?

We acknowledge the fact that it is crucial to be able to configure the Infographic in a visually appealing way. This is why our tool gives you the ability to upload either a single image or two images. Not only that you can upload an image to your infographic but we have also integrated a background removal service within the tool.

Do I need to have the sports data separately to power the Infographics tool?

Luckily you wouldn't have to worry about the data. Our team provides both the data and the tool simultaneously! Select the leagues you want to use the tool for and the data kicks in instantly!

Answers to your questions

How do I make sure that the tool will fit my needs?

We offer each infographic in several different dimensions. Some of them are fit for displaying on a standard TV shape, others are in a more vertical shape which can fit the needs of social media posts. Currently, our tool supports 4 different dimensions - 16:9, 3:2, 1:1 and 4:5.

Can I get the infographic translated into my language?

Our infographics can be translated into multiple languages depending on your needs. Switching between different languages only takes a click.

Can I publish the infographic directly to my social media accounts?

Our tool allows you to link any social media account to it. You can always choose to publish the respective infographic into one of your linked social media accounts or at all of them with just a few simple steps.
